

IRAKLI BEGOIDZE

Software Engineer

SUMMARY

Beginning my coding journey with ReactJS back in 2019, I have quickly added many new technologies into my stack, while still staying true to React and using it on a frequent basis. I have delved into many areas of web and mobile development and have a multitude of tools and frameworks under my belt, including NextJS, React Native, NodeJS+Express, NestJS, MongoDB, SQL and many, many more. If I had to describe myself in short, I would say I am a jack of all trades, master of some.

EDUCATION

Georgian-American High School

Focus on History and Math
2013 – 2018

Georgian Technical University

Bachelor's Degree in Computer Science
2018 – 2022

SKILLS

- ReactJS
- NextJS
- React Native
- NodeJS+Express
- NestJS
- MongoDB
- SQL
- Supabase
- Firebase

CERTIFICATIONS

- TOEFL Certificate in English (C1 level)
- FCE Certificate in English (C1 level)
- DELF Certificate in French (B2 level)

PROFESSIONAL EXPERIENCE

Lead Frontend Developer

Convo Agency | Feb 2022 – May 2023

- Communicate with project manager and international developer team
- Analyze pull requests and give feedback
- Organize NextJS codebase
- Work with GraphQL-based ShopifyAPI
- Provide custom Typescript types and interfaces for vaguely defined data
- Create reusable components
- Implement testing using Jest and React Testing Library
- Experience with Agile development methodologies and working in cross-functional teams

Middle Frontend/Mobile Developer

Conso4s | May 2019 – Dec 2022

- Work on complex admin panel using ReactJS
- Work on React Native application
- Write Stripe webhook code using NodeJS
- Perform Typescript warning and error cleanups using Typescript Compiler
- Provide custom Typescript types and interfaces for vaguely defined data
- Implement Bootstrap template to speed up the development
- Manage CI/CD using Vercel
- Present the progress to clients during videocalls
